

ENS DAO Service Provider Program

Application Acknowledgement Language

The text below is to be reproduced in the SPP3 application post template on the ENS Forum, immediately preceding the submit button or submission mechanism. It captures the applicant's acceptance of the ENS DAO Service Provider Program Terms at the point of application, contingent on selection by the DAO.

ACKNOWLEDGEMENT AND ACCEPTANCE OF PROGRAM TERMS

By submitting this application to the ENS DAO Service Provider Program (the “**Program**”), the applicant (the “**Applicant**”) acknowledges and agrees that:

- (1) The Applicant has read, understood and is willing to be bound by the ENS DAO Service Provider Program Terms (the “**Program Terms**”) in the version published at [URL] and dated 14 May 2026 (Version 1.0) (the “**Applicable Program Terms**”).
- (2) If the Applicant is selected by the DAO, the Applicant will be bound by the Applicable Program Terms (or, if so specified in the Award Notice issued to the Applicant, by such later version of the Program Terms as may be referenced therein in accordance with clause 15 of the Program Terms).
- (3) Prior to the disbursement of any Service Fees, the Applicant will execute the Award Notice issued to it by the ENS Foundation (the “**Foundation**”), in the form annexed to or referenced in the Program Terms, without modification.
- (4) The Applicable Program Terms are not subject to negotiation or modification by the Applicant. Any element of this application that purports to vary, qualify or condition acceptance of the Applicable Program Terms shall have no effect.
- (5) Selection by the DAO does not, of itself, create any contractual obligation on the part of the Foundation, and the Foundation reserves the right not to issue, or not to countersign, an Award Notice in the circumstances described in clause 1.4 of the Program Terms.
- (6) The Applicant confirms that it has identified in this application any anticipated Mandated Copyleft Dependency (as defined in clause 8.1 of the Program Terms) and any other matter that should be disclosed for the purposes of the Applicable Program Terms.

Implementation notes

Two placeholders to populate before the application window opens:

- (a) the URL at which the Applicable Program Terms are published — should be a stable URL, ideally with the version reference embedded in the path;
- (b) the form of Award Notice — annex to, or link from, the published Program Terms.

Where the ENS Forum platform supports a tick-box or affirmative-action mechanism, use it. Where it does not, the language should appear in full as part of the body of the application post, and applicants should be required to reproduce or replicate the acknowledgement section in their application.
